## DETAILED ACTION

### *Claim Rejections - 35 USC § 102.*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-2, 5-10, 13-18, 20-22, 24, 26-28, 30 are rejected under 35 U.S.C. 102(e) as being anticipated by Cho (US Patent No. 6,081,902).

As to claims 1, 8-9, 16-17, 22, 28, Cho discloses a portable computing device, comprising: a graphical display; a power source configured to provide power to generate the graphical display; a selectable control configured to initiate a process to shutdown the portable computing device (col. 4, lines 29-30), and a component configured to turn off the graphical display and conserve the power to operate the graphical display when the selectable control is selected and before the process to shutdown the portable computing device is initiated (col. 4, lines 21-24).

As to claims 2, 10, 18, 27, Cho discloses that the computer is a portable laptop which is inherent to include a battery power source.

As to claims 5, 13, 21, 26, Cho discloses that the component is a graphical display controller.

Art Unit: 2674

As to claims 6, 14, 20, 24, 30, Cho discloses that the component is further configured to determine when the selectable control is selected (col. 4, lines 25-30).

As to claims 7, 15, Cho discloses that the component is a software application configured to determine when the selectable control is selected (see Figs. 4-6).

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

4. Claims 3-4, 11-12, 19, 23, 25 and 29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cho (US Patent No. 6,081,902).

It is noted that Cho discloses using a system power switch to initiate a power shutdown process. Cho does not disclose to select the shutdown process on the screen. However, it is well known in the art to shutdown the computer by selecting a shutdown button displaying on the screen such as taught by applicant's admitted prior art as shown in Fig. 1. it would have been obvious to one of ordinary skill in the art to have modified Cho with the features of the shutdown button as taught in the admitted prior art so that the user can shutdown the computer by using a cursor in stead of pushing a physical switch.

As to claims 3, 11, 19, 23, 29, Cho discloses that the selectable display is configured to display the selectable control.

As to claims 4, 12, 25, Cho discloses that the selectable control is an operating system selectable control displayed on the graphical display.

Art Unit: 2674

***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The US Patent No. 4,065,916, 5,703,629, 5,886,689, 6,278,887, 6,450,958, 2003/0009705 are cited to teach a display with a power control.
